We'd like to thank everybody who participated in the "Gemini suggestion" thread. Unfortunately many things can not be realized from our side. This images doesn't contain any keys or softcams. Backups or other modified Images are not from us and won't be supported!

Recommendation: If you don't install the Image in flash memory, the flash image shouldn't be of a old version. A swap file/partition (>= 16MB) should be present if several processes running in background.
