About this tool

This tool integrates S5 with XWiki. It allows to build a presentation using [S5](#) from [Eric Meyer](#).

It uses XWiki forms to permit creation of a S5 presentation without any use of HTML. It will generate the HTML that is going to be understood by the S5 stylesheet and javascript.

We used a slightly modified version of the S5 model done by [Human Factor](#). Our S5 stylesheets and javascript are available [here](#)
