Netgear DGND3700 ezPlanet v1 Custom Firmware

with Linux IP Virtual Server

This firmware release includes the following updated software:

- openvpn 2.3.10
- improved openvpn configuration page
- openssl 1.0.2g (security update)
- fixes to *config* tool that in richud's firmware overwrite configuration parameters at every reboot
- improved dnsmasq configuration page and fixes to the default configuration
- And in addition kernel modules and ipvsadm tool to turn this router into a hardware **Load Balancer**

Torrent link: [DGND 3700 Annex A ezPlanet v1 torrent](#) Please SEED!

Disclaimer: I built the above firmware for my personal use only as I needed a working dnsmasq and openvpn but these did not work with richud's firmware. I am sharing the firmware I built, but I do not have a 3800, or an Annex B line, nor the time to build other versions.
